

Key Benefits:

- Integrated with Digidesign ProTools wav file management system
- Simplified user controls
- Minimal training required
- Visual analysis
- Powerful digital audio processing
- Attacks a wide array of common noises
- Low cost solution

Best Uses:

- Improving intelligibility
- Portable field operations
- Courtroom preparation
- Reducing common noise problems
- Quick clean-up of audio from surveillance or interview rooms

Ideal Users:

- All TSU & Intel divisions
- Technical investigators
- Intelligence teams
- Field tech offices
- Private investigators

QuickEnhance® version 2.1 is a free download for existing QuickEnhance® Audio Suite customers!

Digital Audio Corporation

QuickEnhance®/AS

Forensic Audio Clarification Software for ProTools Systems

DAC's latest rendition of QuickEnhance® Audio Suite (QE/AS), for use with ProTools®, features enhanced visual analysis, automatic filtering, and an intuitive user interfaced designed to efficiently and effectively improve intelligibility on audio recordings.

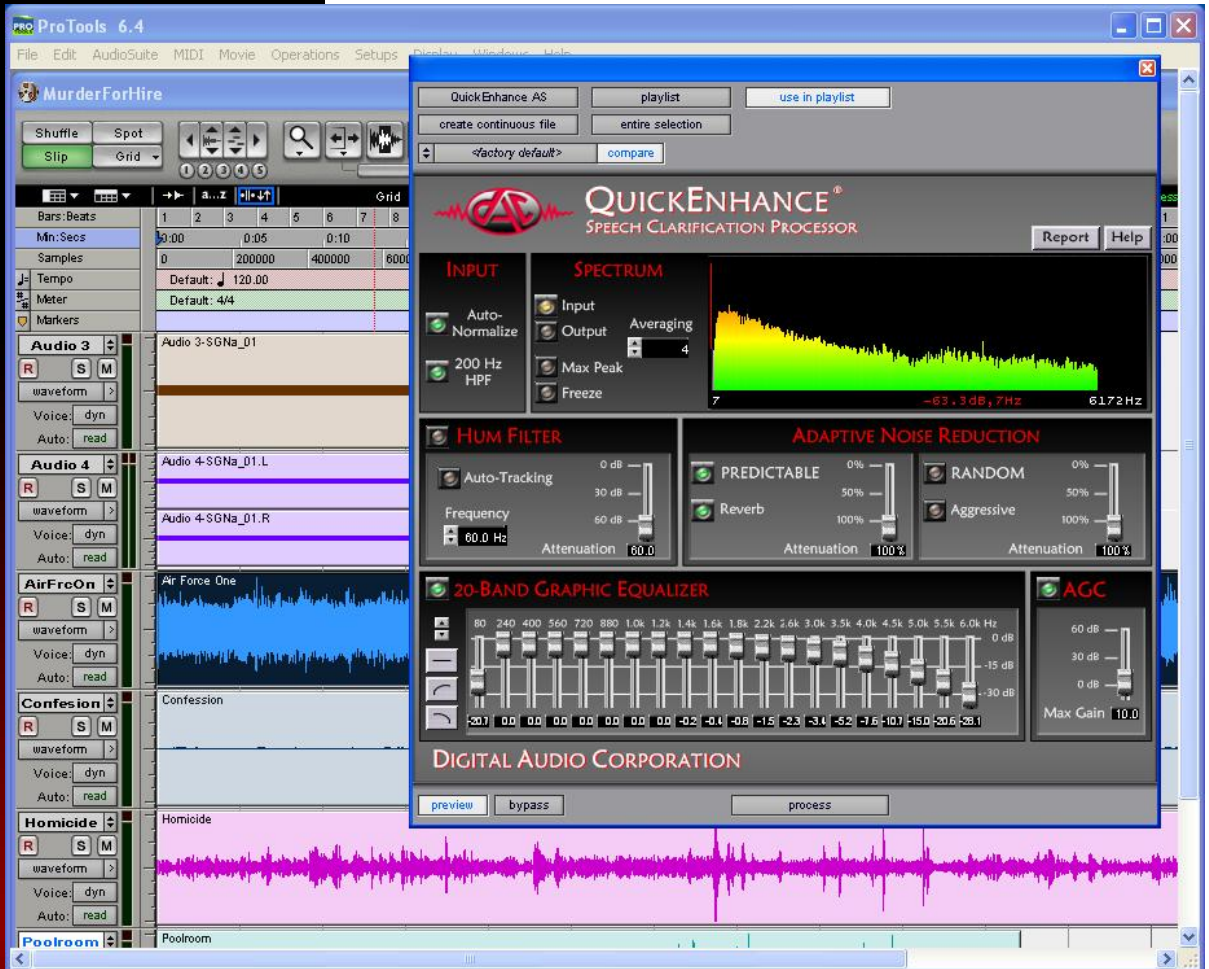

Key Features:

- 20-Band Equalizer for maximum precision and noise reduction control
- 1000-Band Spectrum Analyzer allows users to visualize the audio under investigation, thus increasing user efficiency
- Improved, easy-to-use graphic user interface
- Attacks a wide variety of common noises such as: power hum, static, echo, reverberation, acoustic resonance, hiss, muffling, low talkers, and engine sounds
- Utilize powerful digital processing stages including Hum Filter, Adaptive Predictable Noise Reduction, Adaptive Random Noise Reduction, 20-Band EQ, Automatic Gain Control, Auto Normalization, and 200Hz High Pass Filter.
- Auto-Tracking Precision Hum Filter finds & reduces hum frequencies automatically
- Report Generator outputs filter settings for future reference and accurate case documentation
- Save and recall filter configurations for future processing
- Bypass button for comparison of processed and unprocessed audio
- 200 Hz highpass filter to remove DC offset and low frequency rumble
- Initial auto-normalization stages to maximize signal amplitude
- Operates with Avid Xpress systems running Windows 2000 or higher
- Operates with Digidesign Pro Tools systems version 6.0 or higher
- USB hardware key included
